Subject: Re: OHW-NG One Health Academy - Structure and Function for University networks

Hi Dele,

Here is a side event plan that I drafted for the OHUNs to collaborate with the US National academies and the One Health Platform at the conference in Edinburgh.

I am happy to also liaise further with the One health Platform to gauge the interest in a more lasting relationship for the academy concept. Let's discuss over social time here in Entebbe if you have the time.

Appreciate your including me in your thoughts as they have been developing,

Jonna

Greetings,

We have had the opportunity to present our conceptual framework for a OHUN “owned” One Health Academy, first to USAID and more recently to SEA OHUN. As we prepare to meet with OHCEA in December, I’d like to give an example of what the OHUN Academy could look like at build out, but without reproducing what is already available.

The feedback from USAID is to collaborate with WHO Academy, which seems to be focused now on e-health:

<https://www.who.int/news-room/detail/11-06-2019-collaboration-between-france-and-who-to-realize-the-vision-of-the-who-academy>

<https://www.who.int/ehealth/en/>

The One Health Platform is another potential example, where Jonna, Tracey, and Peter have prominent roles:

<https://onehealthplatform.org/home>

Our Training and Empowerment workgroup will appreciate input from Jonna, Tracey, and Peter about their experiences with OHP, which seems to have defined a scope (see attached); and if there is the possibility of linking with some items in the platform as an initial phase toward building OHUN OH-Academy.

Thanks!

- Dele
